FYVE STAR, Inc.® Est. 1991 provides Products, Services, and Consulting most specific to US Government entities such as Argonne national labs, EG&G, US military bases, and International airports. FYVE STAR, Inc ® is recognized as the Military distributor for industry giants such as Clariant Corporation. The US Air Force is one of our regular customers, and we supply a variety of products to multiple US air bases.

FYVE STAR also represents proprietary disruptive technologies that mill crops for human and animal food, pulverize zeolite and hematite for fire retardant, extract minerals, enrich the soil, remediate bacteria-ridden crops, disinfect agricultural biomass and manure, treat municipal and organic waste-sewage sludge and treat water.

FYVE STAR remains at the forefront of Water Treatment technology in our global search to bring the best there is to offer. Our water treatment team has 40+ years of experience in providing water treatment solutions to clients including municipal authorities, pulp and paper, pharmaceutical, poultry, power, food, beverage, and landfills. Together we provide our customers with top-quality, innovative treatment solutions for the removal of PFAS/PFOA short chains, pharmaceuticals, hormones, TOC, VOCs, metals, BOFD, Ammonia, and TSS. Our wastewater screens have the lowest head loss in the industry which results in the complete removal of debris for a better downstream O & M. Our evaporation technology meets all stringent air quality standards. Our technologies provide a variety of benefits including high-rate flotation of solids without dissolved air, sludge dewatering without operator intervention, and reduced polymer costs and odor removal using green, sustainable seashell media. We provide the lowest CAPEX and OPEX MBR system for difficult wastewater and leachate.

FYVE STAR's client list is extensive and includes international and private airports, Mass Transit Authority, bridge construction companies, mining, agriculture, maritime docks, and shipyards. We also work with private entities including farmers, CO-OPs, and industry professionals. All chemical products related to deicing are FAA Approved.

FYVE STAR regularly works with the SBA, PTAC, DOE, DOD, Forestry, BLM, Clariant Corp, SAIC, DOT, Transit Authority, HAFB Wastewater, GOED, NY Subway & Transit, PANG, Offutt AFB, and many others.

President / CEO - Commander Celeste Gleave is a Veteran of the USAR, and a former Civic leader vetted by the US Air Force and the Pentagon. Commander Celeste Gleave worked beside the US Air Force Chief of Staff & the Air Force Reserve Commander at MAJCOM Warner Robins as a bridge to the civilian families and employers during the Obama presidency. Celeste formed FYVE STAR®, Inc in 1991. FYVE STAR®, Inc has been supplying the US Government and Military for more than 30 years. It is a small business, woman owned, veteran owned, with a 97% ABVS score. Celeste has expertise in government contracting, negotiations, public relations, and sales. She works regularly with the SBA and PTAC as well as the Governors Office of Economic Development.

US GOVERNMENT LIAISON AT EXECUTIVE LEVEL

FYVE STAR®, Inc has established credentials to assist its clients to gain access to the Government and Military sector on a fast track.

Well established C-Level relationships with the US Government will be leveraged to build Partnerships.

We can investigate and secure potential project funding to further advance objectives of the client's product/services.

We can investigate opportunities with a view to securing DOE, FCAB and DOT support and potential project funding.

PROCUREMENT & TECHNICAL GOVERNMENT SUPPORT

Procurement Technical Assistance Center (PTAC) Government Federal Contract and Private Sector platform that hosts RFQ's consolidated onto one database on SAM.

FYVE STAR®, Inc is currently listed as a preferred supplier and is therefore able to expand its supplier verticals with no approval required. For example, FYVE STAR®, Inc can add key words like 'Lithium' to its profile which results in daily Lithium focused RFQ's outlining up to the minute sourcing opportunities.

This allows FYVE STAR® to take advantage of spent battery allotments, for example.
